## CHAS. M. CUNNINGHAM

## WITHDRAWS FROM THE RACE

I have decided to withdraw from the race for sheriff for the reason that I entered too late to make a thorough canvass of the county and for the further reason that I find many of my strong friends are pledged to either Mr. Edwards or Mr. Hall. I did not enter the race at the instance of either of these gentlemen, or to injure or help either of them, and retiring from the race, I do not do so to favor either of them. I shall exercise the American duty of voting for the man I believe best qualified for the office. I desire to thank my friends for their kind expressions of support and for their many kind expressions.

Respectfully yours, Chas. M. Cunningham, (Advertisement.)

## ADMITTS BEING IN STRANGE HOUSE, IS BOUND OVER.

Mexican Youth Found With Clothes and Money Taken From East Sixth Street House.

On a charge of burglary, Clemente Duarte, aged 20, was held to await the action of the grand jury by justice McCintock, Monday. Duarte is alleged to have entered a residence at 112 East Sixth street and took some clothes, also \$10 in cash.

Duarte claimed in court that he formerly had a sweetheart living at that address and that he went to see her in a drunken state. Upon getting inside the house, however, according to his story, he became so drunk he did not know what he was doing and woke up in jail. Stolen articles were found upon

him when arrested by officers, they say. He was carrying the bundle of clothes and had the money in his pocket.

## RAILROAD NEWS. ELECTRIC POWER FOR MEXICAN RAILROAD

Chihuahua and Sonora Mines May Benefit—Big Dam Located.

Chihuahua, Mex., June 27.—The Mayo River Power and Land company of Denver, a corporation, organized with a capitalization of \$5,000,000, U. S. currency, to develop hydro-electric power on the Mayo river in western Chihuahua and eastern Sonora, and for which it acquired a federal concession over a year ago, has its hydraulic engineer, R. M. Jones, and his assistant examining the several rivers in Sinaloa. This being the close of the long dry season the minimum flow of the various streams can be determined readily.

Judge W. O. Temple, secretary of the company, reports from Denver that his company is negotiating with a Mexican railway, presumably the Southern Pacific, on the west coast, to furnish it with power for its entire line. He also states that the company's engineer, R. M. Jones, who was sent to Sinaloa, reports having found requisite sites for the power plants and that the company will be able to furnish the power.

Engineer Jones has located the site for the first dam on the Mayo river near San Bernardo in Sonora, and the plans and specifications of the dam and power plant have been made. From this it is proposed to transmit power to mining camps in Chihuahua and Sonora.
